SUMMARY

Android Developer with 2 years of experience developing Kotlin applications for Android, several of which are live on the Google Play Store. Strong in MVVM, REST API integration, Room persistence and Material Design.

SKILLS

- | | |
|------------------------------------|-----------------------------|
| • Kotlin | • Android Studio |
| • Java | • VS Code |
| • Rest API's | • MVVM Architecture |
| • HTML, CSS, Bootstrap, JavaScript | • Database (Room, Firebase) |

EXPERIENCE

Freelance

Android Developer

- Develop independent Android applications from architecture and UI through to AdMob monetisation, working across the full build on my own.
- [All Document Reader](#): a PDF, Word, PowerPoint and Excel viewer with a zoomable PDF view and a custom canvas-rendered spreadsheet grid.
- [PDF Toolkit](#): offline merge, split, compress, scan and PDF-to-image conversion built on ML Kit, PdfRenderer and PdfDocument.
- [Screen Voice Lock](#): a lock screen with voice, pattern, PIN and fingerprint unlock.
- [AR Drawing](#): camera-based tracing with live overlay drawing, a drawing board and text sketch.

Skills: Kotlin · ML Kit · PdfRenderer · Camera API · Room · AdMob · Google Play Billing · Material Design

CodoLogix

Feb 2025 – Jun 2026

Android Developer · Full-time

- Developed a range of Android applications in Kotlin, covering architecture, feature implementation, debugging and performance optimisation.
- Device security features using intruder detection, acoustic triggers, and motion and hardware sensor monitoring with real-time alerts.
- AI image classification with Camera API capture, plus live tracking, route plotting and marker management on the Mapbox API.
- Interactive 3D globe rendering with OpenGL ES, and Room-backed productivity and health tracking tools with full CRUD and real-time search.

Apps worked on: [Anti Theft Alarm Find My Phone](#) · [Plant ID: AI Plant Identifier](#) · [My GPS Location Now](#) · [Earth Map: 3D Satellite Globe](#) · [Heart Rate Pulse Monitor](#) · [Home Screen Widget Notes](#)

SvenSol Pvt. Ltd.

Sept 2024 – Jan 2025

Android Developer · Internship

- Developed [Background Remover](#) in Kotlin, integrating a pre-trained machine learning model to detect and strip backgrounds from user photos, with an editor for replacing them with a solid colour or a gallery image.

Skills: Kotlin · Machine Learning · Image Processing · Material Design

EDUCATION

BSc Software Engineering | University of Science & Technology, Bannu

2020 – 2024
